Full-Stack Developer and ICT Professional with experience developing web applications, REST APIs, data-driven platforms, and digital systems across government and non-profit environments. Experienced in Python, Node.js, React, PostgreSQL, MongoDB, Docker, and cloud technologies, with exposure to geospatial data systems and data analysis using R. Interested in applying Data Science and Artificial Intelligence to real-world institutional and societal challenges, particularly through data-driven decision-making, automation, and intelligent digital systems.

PROFESSIONAL EXPERIENCE

Software Developer

National Cohesion and Integration Commission (NCIC)

Nov 2025 - Present

Supported NCIC's ICT department in maintaining, securing, and improving digital systems while contributing to web platform development, staff technical support, and policy implementation; all in line with government ICT and data protection standards.

Accomplishments:

- Built a Scheduling System for the CEO, Chairman & Commissioners with role-based access and workflow automation.
- Developed, Maintained and improved NCIC's main website and digital platforms for reliable public access.
- Digitized manual workflows, boosting operational efficiency across internal processes.
- Provided technical support (hardware, software, network) reducing downtime and improving productivity.
- Strengthened ICT security via user account management, monitoring, backups, and compliance with government standards.
- Tested, debugged, deployed, and documented internal ICT applications, improving reliability and adoption.
- Trained staff on admin panel usage for the main website and on managing executive appointments through the scheduling application.
- Drove digital transformation through web-based tools and automation initiatives.

Human Resources Intern - USAID Kenya Feed the Future Food

Systems Activity Technoserve, Nairobi, Kenya

Dec 2024 - Mar 2025

During my internship at TechnoServe, I contributed to streamlining digital workflows within a USAID-funded program. I supported the implementation of tech tools to improve data management, documentation, and team collaboration. This role enhanced my problem-solving skills and deepened my interest in software-driven process optimization.

Accomplishments:

- Supported implementation of digital tools to improve data management, collaboration, and workflow efficiency.
- Assisted staff with virtual collaboration platforms including Zoom and Google Meet.
- Managed shared digital resources and user access permissions.
- Created reporting templates and documentation to streamline administrative processes.

Technoserve, Nairobi, Kenya

Digitizing Human Resource files

Aug - Nov 2024

Contributed to the digital transformation of HR operations by supporting the transition from paper-based records to an organized digital system.

Accomplishments:

- Scanned and organized 200+ HR files, significantly improving document retrieval efficiency and reducing manual search time.

International Center for Insect Physiology and Ecology (ICIPE)

June - Aug 2023

Software Development and Research Intern

Provided platform development support for VectorAtlas.icipe.org, contributing to a geospatial data system. Actively involved in full-stack development while learning new technologies in a collaborative Agile environment.

Accomplishments:

- Coded frontend components using React and built backend APIs with Node.js.
- Performed database operations and queries using PostgreSQL.
- Used Docker Desktop to containerize and manage development environments.
- Learned the R programming language for data analysis tasks.
- Participated in daily standup meetings for task updates and sprint alignment.
- Collaborated with the unit manager in weekly reviews to track project milestones.

EDUCATION

Moringa School

June - Aug 2024

DevOps Engineering

At Moringa School, I trained in DevOps Engineering, gaining hands-on experience in automating, deploying, and managing applications using modern tools. I learned to use Git and GitHub for version control, built CI/CD pipelines with Jenkins and GitHub Actions, and containerized applications using Docker. I also automated infrastructure setup with Ansible and Terraform, deployed projects on AWS and Azure, and implemented monitoring and logging with Prometheus and Grafana. My final project involved deploying a cloud-based full-stack application using React, Node.js, and MongoDB Atlas.

Kabarak University

Sep 2020 - Dec 2024

Bachelor of Business Information Technology (Second class Upper Division)

Precious Blood Riruta

Feb 2016 - Nov 2019

High School

SOFTWARE SKILLS

- Frontend and backend development using React, TypeScript, and Node.js
- Docker
- Jenkins
- pipelines
- Virtual Machines
- Kubernetes
- Familiar with Microsoft 365 tools including Outlook, Teams, OneDrive, and SharePoint.
- R studio/R

SKILLS

- Device installation & configuration
 - Printer & peripheral configuration
 - Computer hardware troubleshooting & maintenance
 - Communication & user support
 - Organization and Time Management
 - Dependable and Responsible
 - Canva
 - Teamwork and Collaboration
 - Data Entry and Analysis
 - System testing & debugging
-
